About Me

Dedicated B.Tech student in Al and ML with a track record of building innovative tech projects, including a full e-commerce site and a telephone directory application. Expertise in Python programming and web development, coupled with strong analytical skills. Known for critical thinking and proactive problem-solving, aimed at delivering impactful solutions.

Detail-oriented with a commitment to driving project success through effective teamwork and leadership.

Education Background

Bachelor of Technology in CSE (AI & ML)
GITAM (Deemed to be) University
08/2024 – 04/2028

Secondary Education
Bosco Public Senior Secondary School
04/2022 – 04/2024

Technical Skill

- Programming Languages - Python, JavaScript, Java, SQL, C

- Web Technologies - HTML, CSS, React.js, PHP, Bootstrap

- Microsoft Power BI

- Core Concepts - Object Oriented Programming, Data structures, Algorithms

Soft Skill

- Problem Solving & Decision making

- Self Learning & Initiative Driven

- Communication & Critical Thinking

- Project Management

- Time Management & Team Collaboration

Projects

E - Commerce Website
11/2023 – 12/2023

- Developed a **React**-based e-commerce user interface using **HTML** and **CSS** for structured and maintainable frontend design.
- **Implemented product listing and cart interaction features** with smooth state-driven Ul updates.
- Designed clear user workflows and responsive layouts to ensure an intuitive and consistent shopping experience.

Eventflow - Event Booking Website
01/2026 – Present

- **Built EventFlow**, a web-based event workflow platform using **React, HTML, CSS, JavaScript**, **PHP backend**, and **MongoDB Atlas**.
- **Developed interactive workflows** with dynamic UI components and API-driven event lifecycle management.
- **Improved scalability and maintainability** using modular React architecture, structured APIs, and optimized MongoDB queries.

CrickRivals - A Fantasy cricket app
06/2025 – 07/2025

- Built CrickRivals, a fantasy cricket app with user authentication, **MySQL**- backed data storage, and a clean **PyQt**-based Ul for creating and managing teams.
- **Implemented core features** like player selection, team creation, add/remove operations, and saving teams to a structured database.
- **Designed the interface using Qt Designer**, converted UI files with **pyuic5**, and developed a simple, user-friendly workflow focused on smooth interaction.

Certifications

- Core Java with Al - Internshala Trainings & IITM Pravartak

- SQL for Data Analytics with Al - Internshala Trainings & IITM Pravartak

- Agile Project Management - HP Life

- Amazon API gateway for serverless applications - AWS certifications

- Web Development with AI Training - Internshala Trainings
